# Franklin International

## **Safety Data Sheet**

**Titebond III Ultimate Wood Glue** 

## Section 1. Identification

| GHS product identifier           | : Titebond III Ultimate Wood Glue                                  |
|----------------------------------|--|
| Other means of<br>identification | : None known.  |
| Product type                     | : Liquid.  |
| CAS #                            | : mixture  |
| Address                          | : Franklin International<br>2020 Bruck Street<br>Columbus OH 43207 |
| Contact person                   | : Franklin Technical Services                                      |
| Telephone                        | : (800) 877-4583   |
| In case of emergency             | : Franklin Security<br>(614) 445-1300                              |
| Reference number                 | : 6192   |
| Product code                     | : 1416   |
| Date of revision                 | : 6/3/2015.  |
| Print date                       | : 6/4/2015.  |
| Chemtrec (24 Hour)               | : (800) 424 - 9300   |
| Chemtrec International           | : (703) 527 - 3887   |
| Chemical family                  | : Adhesive.  |
| Delevent identified on a         | a field and a standard and standard and standard and standards.    |

Relevant identified uses of the substance or mixture and uses advised against

#### Identified uses

Wide dispersive use of substances in professional and DIY adhesives. Industrial use wood glue.

## Section 2. Hazards identification

| OSHA/HCS status                            | : While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product. |
|--|--|
| Classification of the substance or mixture | : Not classified.  |
|  | Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 6.3%  |
| GHS label elements                         |  |
| Signal word                                | : No signal word.  |
| Hazard statements                          | : No known significant effects or critical hazards.  |
| Precautionary statements                   |  |
| General                                    | <ul> <li>Read label before use. Keep out of reach of children. If medical advice is needed,<br/>have product container or label at hand.</li> </ul>  |
| Hazards not otherwise<br>classified        | : None known.  |

## Section 3. Composition/information on ingredients

#### Hazardous ingredients

#### **United States**

| Name                    | CAS number | % |
|-------------------------|------------|---|
| No hazardous ingredient |            |   |

#### Canada

| Name                    | CAS number | % |
|-------------------------|------------|---|
| No hazardous ingredient |            |   |

Г

#### **Mexico**

| Mexico                  |               |           |   |      |   | Classification |   |         |  |
|-------------------------|---------------|-----------|---|------|---|----------------|---|---------|--|
|                         | CAS<br>number | UN number | % | IDLH | Η | F              | R | Special |  |
| No hazardous ingredient |               |           |   |      |   |                |   |         |  |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First aid measures

#### **Description of necessary first aid measures**

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>   |
|--------------|---|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.   |
| Skin contact | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>  |
| Ingestion    | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effect | <u>ets</u>  |
|-------------------------------|---|
| Eye contact                   | : No known significant effects or critical hazards. |
| Inhalation                    | : No known significant effects or critical hazards. |
| Skin contact                  | : No known significant effects or critical hazards. |
| Ingestion                     | : No known significant effects or critical hazards. |
| Over-exposure signs/symp      | <u>toms</u>   |
| Eye contact                   | : No specific data.                                 |
| Inhalation                    | : No specific data.                                 |
| Skin contact                  | : No specific data.                                 |
| Ingestion                     | : No specific data.                                 |
|                               |   |

#### Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

#### Section 4. First aid measures

Specific treatments Protection of first-aiders : No specific treatment.

: No action shall be taken involving any personal risk or without suitable training.

#### See toxicological information (Section 11)

#### Section 5. Fire-fighting measures **Extinguishing media** Suitable extinguishing : Use an extinguishing agent suitable for the surrounding fire. media Unsuitable extinguishing : None known. media Specific hazards arising : In a fire or if heated, a pressure increase will occur and the container may burst. from the chemical Hazardous thermal : Decomposition products may include the following materials: carbon dioxide decomposition products carbon monoxide **Special protective actions** : Promptly isolate the scene by removing all persons from the vicinity of the incident if for fire-fighters there is a fire. No action shall be taken involving any personal risk or without suitable training. **Special protective** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. equipment for fire-fighters

#### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel  | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Put on appropriate personal<br>protective equipment.   |
|------------------------------|----|--|
| For emergency responders     | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions    | :  | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and materials for co | nt | ainment and cleaning up  |
| Small spill                  | :  | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                  | -  | Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

| Precautions for safe handling                                      |   |
|--|---|
| Protective measures  | : Put on appropriate personal protective equipment (see Section 8).   |
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store between the following temperatures: -15.309 to 23.889°C (4.4 to 75°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **United States**

#### **Occupational exposure limits**

| Ingredient name                | Exposure limits |
|--------------------------------|-----------------|
| No exposure limit value known. |                 |

#### <u>Canada</u>

| Occupational exposure limits   |           | TWA (8 hours) |           |       | STEL (15 mins) |           |       | Ceiling |           |       |           |
|--------------------------------|-----------|---------------|-----------|-------|----------------|-----------|-------|---------|-----------|-------|-----------|
| Ingredient                     | List name | ppm           | mg/<br>m³ | Other | ppm            | mg/<br>m³ | Other |         | mg/<br>m³ | Other | Notations |
| No exposure limit value known. |           |               |           |       |                |           |       |         |           |       |           |

#### **Mexico**

#### **Occupational exposure limits**

| Ingredient                     | Exposure limits |
|--------------------------------|-----------------|
| No exposure limit value known. |                 |

#### Consult local authorities for acceptable exposure limits.

| Appropriate engineering controls | : | Good general ventilation should be sufficient to control worker exposure to airborne contaminants.  |
|----------------------------------|---|---|
| Environmental exposure controls  | : | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measures   | S |   |
| Hygiene measures                 | : | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |

## Section 8. Exposure controls/personal protection

|                        | • •   |
|------------------------|---|
| Eye/face protection    | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. |
| Skin protection        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.   |
| Body protection        | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.                                     |

## Section 9. Physical and chemical properties

| <u>Appearance</u>                      |   |
|--|---|
| Physical state                         | : Liquid.   |
| Color                                  | : Brown. [Light]  |
| Odor                                   | : Characteristic. [Slight]                                      |
| Odor threshold                         | : Not available.  |
| рН                                     | : 2.5 to 3.5  |
| Melting point                          | : Not available.  |
| Boiling point                          | : 98.889°C (210°F)  |
| Flash point                            | : Closed cup: >93.333°C (>200°F) [Setaflash.]                   |
| Evaporation rate                       | : <1 (butyl acetate = 1)  |
| VOC (less water, less exempt solvents) | : 5.6 g/l   |
| Relative density                       | : 1.11  |
| Solubility                             | : Soluble in the following materials: cold water and hot water. |

## Section 10. Stability and reactivity

| Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.           |
|---------------------------------------|--|
| Chemical stability                    | : The product is stable.   |
| Possibility of hazardous<br>reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                   | : No specific data.  |
| Incompatible materials                | : No specific data.  |
| Hazardous decomposition products      | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

| Information on toxicological                 | effects  |
|--|--|
| Information on the likely routes of exposure | : Routes of entry not anticipated: Oral, Dermal, Inhalation.   |
| Potential acute health effect                | <u>S</u>   |
| Eye contact                                  | : No known significant effects or critical hazards.            |
| Inhalation                                   | : No known significant effects or critical hazards.            |
| Skin contact                                 | : No known significant effects or critical hazards.            |
| Ingestion                                    | : No known significant effects or critical hazards.            |
| Symptoms related to the phy                  | vsical, chemical and toxicological characteristics             |
| Eye contact                                  | : No specific data.  |
| Inhalation                                   | : No specific data.  |
| Skin contact                                 | : No specific data.  |
| Ingestion                                    | : No specific data.  |
| Delayed and immediate effe                   | cts and also chronic effects from short and long term exposure |
| <u>Short term exposure</u>                   |  |
| Potential immediate<br>effects               | : Not available.   |
| Potential delayed effects                    | : Not available.   |
| <u>Long term exposure</u>                    |  |
| Potential immediate<br>effects               | : Not available.   |
| Potential delayed effects                    | : Not available.   |
| Section 12. Ecologic                         | al information   |
| Toxicity                                     |  |
|  |  |

| Other adverse effects        | : | No known significant effects or critical hazards. |
|------------------------------|---|---|
| Not available.               |   |   |
| Persistence and degradabilit | Y |   |
| <b>Conclusion/Summary</b>    | 1 | Not available.                                    |
| Texterty                     |   |   |

#### Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

## Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
