SECTION 2. HAZARDS IDENTIFICATION

Classification of the chemical

Clear to slightly hazy amber liquid.Solvent odor.

This material is classified as hazardous under U.S. OSHA regulations (29CFR 1910.1200) (Hazcom 2012) and Canadian WHMIS regulations (Hazardous Products Regulations) (WHMIS 2015).

Classification: Flammable liquid- Category 3 Acute Toxicity, dermal - Category 4 Acute Toxicity, inhalation - Category 3 (vapor) Skin Corrosion/Irritation - Category 2 Eye damage/irritation - Category 2 Aspiration Toxicity - Category 1 Reproductive toxicity-Category 2 Carcinogen - Category 2 Specific target organ ooxicity, single exposure - Category 3 (narcotic effects) Specific target organ toxicity, single exposure - Category 3 (respiratory)

SAFETY DATA SHEET

Hazard statement(s)

Flammable liquid and vapor. Harmful in contact with skin. Toxic if inhaled. Causes skin irritation. Causes serious eye irritation. May be fatal if swallowed and enters airways. May cause respiratory irritation. May cause drowsiness and dizziness. Suspected of damaging the unborn child. Suspected of causing cancer.

Precautionary statement(s)

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, sparks and open flame - No smoking. Ground and bond container and receiving equipment. Use explosion-proof electrical and ventilating equipment. Use non-sparking tools. Take precautionary measures against static discharge. Avoid breathing vapors or mists. Use only outdoors or in a well-ventilated area. Wear protective gloves/clothing and eye/face protection. Wash hands thoroughly after handling.

IF exposed or concerned: Get medical attention/advice.

IF ON SKIN: Wash with plenty of water and soap. Take off contaminated clothing and wash it before reuse.Call a POISON CENTER or doctor/physician if you feel unwell. If skin irritation occurs: Get medical advice/attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor/physician.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention.

IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. Do NOT induce vomiting.

In case of fire: Use water fog, dry chemical, CO2 or 'alcohol' foam to extinguish.

Store in a well-ventilated place. Keep cool. Keep container tightly closed. Store locked up.

Dispose of contents/container in accordance with local/regional/national/international regulations.

Other hazards

No OSHA defined hazard classes.

Other hazards which do not result in classification:

May be sensitive to static discharge. Burning produces obnoxious and toxic fumes.

Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. Prolonged or repeated contact may cause drying, cracking and defatting of the skin.

Environmental precautions: Avoid release to the environment. See ECOLOGICAL INFORMATION, Section 12.

SECTION 4. FIRST-AID MEASURES

Description of first aid measures

Ingestion	: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. Do NOT induce vomiting. Aspiration hazard. Never give anything by mouth to an unconscious person. If vomiting occurs spontaneously, keep victim's head lowered (forward) to reduce the risk of aspiration.
Inhalation	 If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor/physician. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen by qualified medical personnel only.
Skin contact	: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Call a POISON CENTER or doctor/physician if you feel unwell. If skin irritation occurs, get medical advice/attention.
Eye contact	: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention.
Most important symptoms an	d effects, both acute and delayed
	: IF exposed or concerned: Get medical attention/advice. Harmful in contact with skin. May be absorbed through the skin, producing symptoms
	similar to ingestion or inhalation. Toxic if inhaled. Symptoms may include coughing, choking and wheezing. May cause respiratory impairment and lung damage.
	Causes skin irritation. Symptoms may include redness, itching and swelling. Causes serious eye irritation. Symptoms may include redness, pain, tearing and conjunctivitis.
	May be fatal if swallowed and enters airways. Aspiration hazard - material may cause lung inflammation or damage if it enters lungs through vomiting or swallowing. Symptoms include coughing, shortness of breath and wheezing.
	May cause respiratory irritation. Symptoms may include upper respiratory irritation, coughing and breathing difficulties.
	May cause drowsiness and dizziness. Symptoms may include pain, headache, nausea, vomiting, dizziness, drowsiness and other central nervous system effects. Suspected of causing cancer. Symptoms may include persistent coughing, shortness of breath, coughing up blood and wheezing. Suspected of damaging the unborn child. Symptoms may include reduced fetal weight,
	delayed ossification and persistent behavioural effects.
Indication of any immediate r	Prolonged overexposure may cause slight liver and kidney effects, such as increased organ weights. SECTION 5. FIRE-FIGHTING MEASURES Extinguishing media Suitable extinguishing media Dry chemical, foam, carbon dioxide and water fog. Unsuitable extinguishing media : Do not use a solid water stream as it may scatter and spread fire. Special hazards arising from the substance or mixture / Conditions of flammability : Flammable liquid and vapour. Keep away from heat, sparks and open flames. May accumulate static charge by flow or agitation. After prolonged storage, may release explosive peroxides in the presence of air. Vapors may travel considerable distance to a source of ignition and flash back. Vapours may be heavier than air and may collect in confined and low-lying areas. Product may float, and be re-ignited at the water's surface. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure. Flammability classification (OSHA 29 CFR 1910.106) : Flammable Liquids - Category 3 Hazardous combustion products Carbon oxides. Polycyclic aromatic hydrocarbons. Reactive hydrocarbons. Nitrogen oxides. Aldehydes. Other irritating fumes and smoke. Special protective equipment and precautions for firefighters Protective equipment for fire-fighters : Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Special fire-fighting procedures Move containers from fire area if safe to do so. Cool closed containers exposed to fire with water spray. Prevent runoff from fire control or dilution from entering sewers, drains, drinking water supply or any natural waterway. Dike for water control. SECTION 6. ACCIDENTAL RELEASE MEASURES Personal precautions, protective equipment and emergency procedures : Evacuate personnel to safe areas. Keep all other personnel upwind and away from the spill/ release. All persons dealing with clean-up should wear the appropriate protective equipment including self-contained breathing apparatus. Restrict access to area until completion of clean-up. Refer to protective measures listed in sections 7 and 8. Environmental precautions : Ensure spilled product does not enter drains, sewers, waterways, or confined spaces. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or drinking supply. Methods and material for containment and cleaning up : Ventilate the area. Remove all sources of ignition. Prevent further leakage or spillage if safe to do so. Use only non-sparking tools. For spilled liquids: absorb spill with inert, non-combustible material such as sand, then place into suitable containers. Do not

containers. Contaminated absorbent material may pose the same hazards as the spilled product. Contact the proper local authorities.

Special spill response procedures

 In case of a transportation accident, in the United States contact CHEMTREC at 1-800-424-9300 or International at 1-703-527-3887. If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8802). US CERCLA Reportable quantity (RQ): Naphthalene (100 lbs / 45.4 kg) Xylene (100 lbs / 45.4 kg) Cumene (5000 lbs / 2270 kg) Ethylbenzene (1000 lbs / 454 kg)

use combustible absorbents, such as sawdust. Bond and ground transfer containers and equipment to avoid static accumulation. Pick up and transfer to properly labeled

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling

: Conditions for safe storage	 Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use only outdoors or in a well-ventilated area. Keep away from heat, sparks and open flame - No smoking. Keep container tightly closed. Ground/Bond container and receiving equipment. Use explosion-proof electrical and ventilating equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Wear protective gloves/clothing and eye/face protection. Avoid breathing mist or vapours. Wash thoroughly after handling. Do not ingest. Do not eat, drink, smoke or use cosmetics while working with this product. Avoid contact with skin, eyes and clothing. Avoid contact with incompatible materials. Store in a well ventilated place. Keep cool. Keep container tightly closed. Store locked up. Store away from incompatibles and out of direct sunlight. After prolonged storage, may release explosive peroxides in the presence of air. Direct sunlight or heat may accelerate the release of peroxides. Rate of peroxide formation is not known. Take measures to prevent the build up of electrostatic charge. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized
Incompatible materials	personnel. Inspect periodically for damage or leaks. No smoking in the area. Strong oxidizing agents, Perchloric acid, Bases .

Exposure controls

Ventilation and engineering measures

Respiratory protection	Use only outdoors or in a well-ventilated area. Use explosion-proof electrical and ventilating equipment. Apply technical measures to comply with the occupational exposure limits. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. In case of insufficient ventilation wear suitable respiratory equipment. If engineering controls and work practices are not effective in controlling exposure to this material, then wear suitable approved respiratory protection. If the TLV is exceeded, a NIOSH/MSHA-approved respirator is advised. Respirators should be selected based on the form and concentration of contaminants in air, and in accordance with OSHA (29 CFR 1910.134) or CSA Z94.4-02.	
Skin protection	Wear protective gloves/clothing. Where extensive exposure to product is possible, us resistant coveralls, apron and boots to prevent contact. The suitability for a specific workplace should be discussed with the producers of the protective gloves.	se
Eye / face protection	Wear eye/face protection. Chemical splash goggles are recommended. A full face shield may also be necessary.	
Other protective equipment	Ensure that eyewash stations and safety showers are close to the workstation locatic Other equipment may be required depending on workplace standards.)n.
General hygiene considerations		
	Avoid breathing mist or vapor. Avoid contact with skin, eyes and clothing. Do not eat, drink, smoke or use cosmetics while working with this product. Upon completion of work, wash hands before eating, drinking, smoking or use of toilet facilities. Remove and wash contaminated clothing before re-use. Handle in accordance with good industrial hygiene and safety practice.	1

Potential Health Effects:

Signs and symptoms of short-term (acute) exposure

Sign and symptoms Inhalation

	Toxic if inhaled. Inhalation may cause respiratory irritation and central nervous system depression. Symptoms include: Upper respiratory irritation, coughing, sneezing, staggering gait, giddiness, drowsiness, slurred speech, nausea, and possible nervous system depression.	
Sign and symptoms ingestion		
:	Ingestion may irritate digestive tract and cause nausea, vomiting and diarrhea. Causes symptoms similar to those listed for inhalation. May be fatal if swallowed and enters airways. Aspiration hazard - material may cause lung inflammation or damage if it enters lungs through vomiting or swallowing. Symptoms include coughing, shortness of breath and wheezing.	
Sign and symptoms skin	Harmful in contact with skin. May be absorbed through the skin, producing symptoms similar to ingestion or inhalation. Causes skin irritation. Symptoms include: Dryness, itching, cracking, burning, redness and swelling.	
Sign and symptoms eyes	Causes serious eye irritation. Symptoms may include redness, pain, tearing and conjunctivitis.	
Potential Chronic Health Effects		
Mutagenicity	Prolonged or repeated contact may cause drying, cracking and defatting of the skin. Chronic overexposure to 2-butoxyethanol may cause liver, kidney and blood damage. Not expected to be mutagenic in humans.	
wutagemuity .	not expected to be mulayering in mumans.	

Carcinogenicity :	This material is classified as hazardous under U.S. OSHA regulations (29CFR 1910.1200) (Hazcom 2012) and Canadian WHMIS regulations (Hazardous Products Regulations) (WHMIS 2015). Classification : Carcinogenicity- Category 2 Suspected of causing cancer.
Reproductive effects & Teratog	Contains Naphthalene. Naphthalene is classified as carcinogenic by IARC (Group 2B) and NTP (Group 2 - Reasonably anticipated). Contains Ethylbenzene. Ethylbenzene is classifed as carcinogenic by IARC (Group 2B) and ACGIH (Category A3). Contains Cumene. Cumene is classified as possibly carcinogenic by IARC (Group 2B). genicity

SECTION 13. DISPOSAL CO	DNSIDERATIONS				
- .	Handle in accordance with good industrial hygiene and safety practice. Refer to protective measures listed in sections 7 and 8. Dispose in accordance with all applicable federal, state, provincial and local				
RCRA : If this product, as supplied, becomes a waste in the United States, it may mee criteria of a hazardous waste as defined under RCRA, Title 40 CFR 261. It is responsibility of the waste generator to determine the proper waste identificated disposal method. For disposal of unused or waste material, check with local, se federal environmental agencies.					

SECTION 14. TRANSPORT INFORMATION

Regulatory Information	UN Number	UN proper shipping name	Transport hazard class(es)	Packing Group	Label			
49CFR/DOT	UN1993	FLAMMABLE LIQUID, N.O.S. (Aromatic naphtha; Trimethylbenzene)	3	III	3			
49CFR/DOT Additional information	49 CFR Section	n road or rail shipment if packaged in non-bulk containers n 173.150. eets the criteria for an environmentally hazardous material	,		,			
TDG	UN1993	FLAMMABLE LIQUID, N.O.S. (Aromatic naphtha; Trimethylbenzene)	3	III				
TDG Additional information	This material may be shipped as non-regulated material when in small means of containment (<450 Litres), provided the requirements of TDG section 1.33 are met. This product meets the criteria for an environmentally hazardous material according to the IMDG Code.							

Special precautions for user Environmental hazards	 Keep away from heat, sparks and open flame - No smoking. This product meets the criteria for an environmentally hazardous material according to the IMDG Code. See ECOLOGICAL INFORMATION, Section 12. 				
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

SARA TITLE III: Sec. 311 and 312, SDS Requirements, 40 CFR 370 Hazard Classes: Physical hazards (Flammable) Health hazards (Acute toxicity; Eye irritation; Skin irritation; Aspiration hazard; Specific target organ toxicity, single exposure; Carcinogenicity; Reproductive toxicity). Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are 500 pounds or the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.
